

Rotating Jib Winch

The Terex Rotating Jib winch is available on all Terex TL Series as well as all larger models. The winch is mounted on the boom and depending on the load on the platform can lift 454kg as a material handling device. The unit is hydraulically driven and may be mounted or demounted in minutes.

A typical load chart is shown below.

TL41 [13m EWP] JIB LIFTING CAPACITY in KGS - Sample Chart								
Winch Centre to Load Line in mm								
	Up to 600	600-900	900-1200	1200-1500	Over 1500			
Jib Angle	75°	635	340	295	136	91		
	60°	567						
	45°	454	283	136				
	30°	160						
	15°	181	170	159				
	0°	136	136	136				
	-15°	181	170	204				
	-30°	283	283	295				
	-40°	408	340	0				
	MAX	680	340	295			181	181

EQUIPPED AS FOLLOWS

- SIDE MOUNT BOOM TIP
- 180 KG IN PLATFORM
- 90% OF UNUSED BASKET CAPACITY CAN BE ADDED TO JIB
- NOT TO EXCEED MAX VALUES
